

# STUDY ENGLISH APP

Our app helps users improve English through vocabulary practice, voice recordings, and AI feedback. Users learn vocabulary, record audio, and interact with an AI tutor that corrects pronunciation, rhythm, and emphasis. Available on iOS and Android, it makes learning English interactive and effective.

# Study ENGLISH

## Summary of how app works

The app helps users improve their English in a step-by-step process. First, users study vocabulary and example sentences to build their language foundation. Next, they practice speaking by recording their voice, while the AI teacher evaluates their pronunciation and language skills. After that, users engage in a simple conversation with the AI teacher, using the vocabulary they've learned. The conversation is recorded, and the AI provides feedback, correcting any pronunciation mistakes and teaching users the correct way to pronounce words. Additionally, the AI helps users with longer sentences by teaching them where to place emphasis, accents, and how to maintain proper rhythm. One of the key features is the ability for users to listen to their own recordings, allowing them to evaluate their pronunciation objectively.

## key features of the app

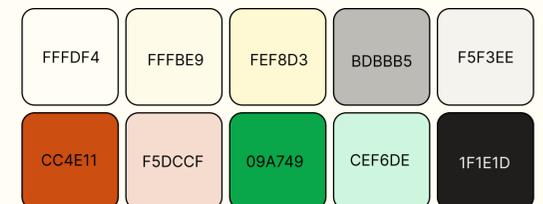

- Improve user vocabulary
- Improve user pronunciation
- Record user pronunciation and compare it with the correct pronunciation
- Have natural conversations with the AI teacher

## Testimonials from users

"This app has boosted my confidence in speaking English. I love the voice recording feature—being able to hear my mistakes and correct them with the AI's help has made a huge difference."

"I use this app to improve my pronunciation for work, and it's been amazing. The AI helps me with both pronunciation and sentence stress. The voice recordings let me track my progress and feel more confident in meetings."

"This app makes learning fun and interactive. I get real-time feedback on my pronunciation and rhythm, which helps me sound more natural in conversations. The voice recording feature is super helpful for tracking improvement!"
